Education

Netaji Subhas University of Technology (NSUT) **Jan 2022 - May 2025**
Bachelor of Technology in Computer Science & Engineering (CGPA of 7.68) *Delhi, India*

Experience

Software Engineer **Dec 2025 – Present**
Microsoft *Hyderabad*

- Built the portal experience for **Cross-Tenant Restore (CTR)** across Recovery Services and Backup vaults, covering vault mapping, mapped items, jobs and restore flows in **React + TypeScript**, shipped as **Preview**.
- Delivered **time-based vault immutability** across vault Create, Settings and Properties, protected by **Multi-User Authorization (Resource Guard)** to harden backups against **ransomware**.
- Integrated **Microsoft Defender for Cloud** threat detection into Azure Backup with per-item and **bulk enable/disable for up to 100 VMs**.
- Added **VMSS Flex** fault-domain and availability-zone placement to **Azure Site Recovery** Enable DR, failover and re-protect flows.
- Built an AI **DRI agent** (**TypeScript**, **Copilot CLI**, **MCP**, **Kusto**) that triages **5 BVT pipelines** and IcM incidents, drafts RCAs, and reports through **Teams** and a **React** dashboard.
- Fixed **25+ accessibility defects**, resolved **10 customer-facing IcM/CRI incidents** (e.g. Backup Center failing to load in large tenants), and shipped **14 reliability fixes** to make **E2E BVTs** robust across Azure Files, VM, ASR and Defender suites.

Software Engineer **June 2025 – Dec 2025**
Ethos *Bangalore*

- Deployed the **pdf-hub** microservice to **production** critical for **unlock** and **HTML-to-PDF** operations and added **Datadog monitors** and **SLOs** to improve reliability and visibility.
- Improved **security** by removing decrypted **driver's license data** from **backend flows**; ensured only the **encrypted value** was stored and applied **runtime decryption** when required, preventing sensitive **PII** from persisting across the application.
- Built an **API enhancement** for the **Product Routing Service (PRS)** to return **decline reasons** for products tied to a given `policyId`, improving **transparency** for both consumers and partners.
- Enabled **partners** to understand **commission changes** when PRS rerouted users to lower-commission products, while simplifying **internal debugging** of declined product flows.

Software Engineer Intern **Jan 2025 - May 2025**
Shipsy *Gurgaon*

- Developed a comprehensive finance mobile web view UI for QuiqUp, integrating APIs for riders to access their financial information with adaptable client-specific configurations.
- Optimized bulk pickup processing by implementing **Promise.all** for concurrent conflict resolution and database operations, resulting in a 3x speedup of API performance.
- Delivered a hyperlocal phone exchange module for **Flipkart**, enabling doorstep device swaps in 10 minutes through real-time assessment checks.
- Designed and rolled out an **adhoc pickup flow** for Movin that lets riders collect consignments not yet registered in the hub manager's ops dashboard, eliminating manual entry.

Projects

GROWTH TRACKER | *React, TypeScript, Go, PostgreSQL, Redis, WebSocket, Docker, Azure* | Live | Github

- Built a **Go (Fiber)** backend on **clean architecture** with **JWT auth**, rate limiting, and **OpenAPI** documentation.
- Shipped a **React 19 + TypeScript PWA** using **Zustand** with offline-first UX and service worker caching.
- Implemented **real-time** + **push** notifications via **WebSockets** (Redis session tracking) and **Azure Service Bus** (delivery pipeline).
- Built social + engagement features: **feeds**, follow/like, **streaks**, and **badges**, optimized with **Redis** caching.
- Delivered an Instagram-style **Stories** module with **Azure Blob** storage, thumbnail generation, and **Redis + Lua** atomic like counts.
- Implemented type-ahead search using **PostgreSQL pg_trgm** fuzzy matching with personalized trending and recent-search throttling.
- Set up separate **dev** and **prod** environments with **Docker Compose** and isolated services/configuration.
- Added production observability with **Axiom** structured logging for debugging and monitoring.

Achievements

- **Knight** on LeetCode, Max Rating: **1878**, demonstrating strong problem-solving abilities.
- Achieved **991** global rank out of 23,404 in LeetCode US Weekly Contest 376.
- Achieved a global rank of **603** in CodeChef Starters 136 Division 3.
- Solved more than **1000+** Data Structures & Algorithms problems across platforms (LeetCode, Codeforces, etc.)

Technical Skills

- **Programming Languages**: Problem Solving, C++, Golang, Python, Rust
- **Web Development**: HTML/CSS, JavaScript, TypeScript, ReactJS, Node.js, NextJS, LoopBack, WorkFlow Builder, Jest
- **Databases**: MySQL, Google Firebase, MongoDB, PostgreSQL
