EDUCATION

Netaji Subhas University of Technology (NSUT)

Bachelor of Technology in Computer Science & Engineering (CGPA of 7.68)

Jan 2022 - May 2025

Delhi, India

EXPERIENCE

Software Engineer

June 2025 – Present

Ethos

Bangalore

- Deployed the **pdf-hub** microservice to **production**—critical for **unlock** and **HTML-to-PDF** operations—and added **Datadog monitors** and **SLOs** to improve reliability and visibility.
- Improved **security** by removing decrypted **driver's license data** from **backend flows**; ensured only the **encrypted value** was stored and applied **runtime decryption** when required, preventing sensitive **PII** from persisting across the application.
- Built an **API enhancement** for the **Product Routing Service (PRS)** to return **decline reasons** for products tied to a given **policyId**, improving **transparency** for both consumers and partners.
- Enabled **partners** to understand **commission changes** when PRS rerouted users to lower-commission products, while simplifying **internal debugging** of declined product flows.

Software Engineer Intern

Jan 2025 - May 2025

Shipsy

Gurgaon

- Developed a comprehensive finance mobile web view UI for QuiqUp, integrating APIs for riders to access their financial information with adaptable client-specific configurations.
- Optimized bulk pickup processing by implementing **Promise.all** for concurrent conflict resolution and database operations, resulting in a 3x speedup of API performance.
- Delivered a hyperlocal phone exchange module for **Flipkart**, enabling doorstep device swaps in 10 minutes through real-time assessment checks.
- Designed and rolled out an **adhoc pickup flow** for Movin that lets riders collect consignments not yet registered in the hub manager's ops dashboard, eliminating manual entry.

PROJECTS

GROWTH TRACKER | React, TypeScript, Go, PostgreSQL, Redis, WebSocket, Docker, Azure | [Live](#) | [Github](#)

- Built a scalable **Go backend** using **clean architecture** (handlers/services/repositories) for clear separation of concerns.
- Developed a responsive **React 19 + TypeScript PWA** with **Zustand** state management and **push notifications**.
- Designed **REST APIs** in Go (Fiber) with **JWT auth**, middleware (CORS, rate limiting), and **OpenAPI** docs.
- Implemented **real-time notifications** via **WebSockets** with **Redis**-backed connection/session tracking.
- Built a reliable push pipeline using **Web Push** and **Azure Service Bus** for message delivery.
- Integrated cloud storage (**Azure Blob**) and **Azure PostgreSQL** (serverless) with **Redis** caching.
- Implemented **structured logging** with **Axiom** for centralized observability and production debugging.
- Shipped engagement features including **streaks**, **badges**, and social interactions (follow/like/feeds).
- Containerized local dev with **Docker Compose** for consistent PostgreSQL/Redis/Azurite environments.

ACHIEVEMENTS

- **Knight** on LeetCode, Max Rating: **1878**, demonstrating strong problem-solving abilities.
- Achieved **991** global rank out of 23,404 in LeetCode US Weekly Contest 376.
- Achieved a global rank of **603** in CodeChef Starters 136 Division 3.
- Solved more than **1000+** Data Structures & Algorithms problems across platforms (LeetCode, Codeforces, etc.)

TECHNICAL SKILLS

- **Programming Languages:** Problem Solving, C++, Golang, Python
- **Web Development:** HTML/CSS, JavaScript, TypeScript, ReactJS, Node.js, NextJS, LoopBack, WorkFlow Builder, Jest
- **Databases:** MySQL, Google Firebase, MongoDB, PostgreSQL
- **Version Control:** Git, GitHub
- **Coursework:** Object-Oriented Programming (OOPS), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)
